twentyfive50 vertebra with open top filer

The Vertebra storage system offers the perfect solutions for all the storage functionality you need: Filing, Organization, Versatility and Space Utilization.

The Vertebra storage system is made up of a modular top storage unit, and bottom storage unit.

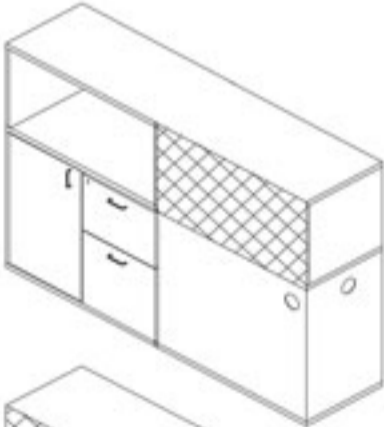

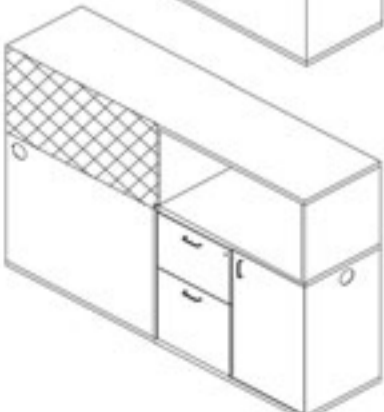

The top storage unit is comprised of a pinboard section, and adjacent to the pinboard section, is a choice of either open storage or roller door storage compartments.

The bottom storage unit consists of a hinge door compartment, with a single shelf, and adjacent to the hinge door compartment, is a drawer unit consisting

of 2 drawers (One single drawer, with a drop in pen and pencil tray and one drawer as a deep filer). The Vertebra storage system has an integrated cable management

compartment, placed between the top and bottom storage units, and is primarily used for reticulation purposes. Power and data cables are conveniently delivered to workstations through cable management ports, located on the sides, middle and back of the Vertebra storage units.
